MOVING TIPS

8 STEPS TO MAKE IT

1) CREATE A MOVING TIMELINE:

Plan your move in advance. Create a timeline that includes important dates such as packing start date, hiring movers, and the moving day itself. This will help you stay organized and reduce last-minute stress.

2) DECLUTTER BEFORE PACKING:

Before you start packing, go through your belongings and decide what you want to keep, donate, or discard. Moving is a great opportunity to downsize and simplify your life.

3) PACK AN ESSENTIALS BOX:

Pack a separate box with essentials you'll need immediately upon arrival at your new home, such as toiletries, a change of clothes, important documents, and basic kitchen supplies. This will save you from going through the boxes on day #1.

4) USE COLOR-CODED LABELS:

Color-coded labels or stickers can make the unpacking process much smoother. Assign a color to each room and mark your boxes accordingly. This way, movers and helpers can quickly identify where each box belongs.

5) PROTECT FRAGILE ITEMS:

Wrap fragile items like glassware, dishes & ornaments with extra care. Use bubble wrap, packing paper, or foam padding to cushion delicate items. Label these boxes as "Fragile" to ensure careful handling.

6) SECURE LIQUIDS & CLEANING SUPPLIES:

Seal all bottles containing liquids, such as cleaning supplies and toiletries, in plastic bags to prevent leaks during transit. Consider packing these items separately from your other belongings.

7) DISASSEMBLE FURNITURE PROPERLY:

If you need to disassemble furniture, be sure to keep all screws, bolts, and small parts in labeled plastic bags. It's also a good idea to tape these bags to the furniture they belong to for easy reassembly.

8) NOTIFY IMPORTANT PARTIES:

Don't forget to notify important parties of your move, such as your post office, utility providers, banks, and subscriptions. Update your address with them well before moving day.

9) BACK UP DIGITAL DATA:

If you're moving electronic devices like computers, make sure to back up your important data before disconnecting and packing them. Consider transporting sensitive electronics in your car rather than the moving truck.

10) TAKE PHOTOS OF ELECTRONICS:

Before disconnecting cords and cables from your electronics, take photos of how everything is connected. This will make it easier to set up your devices in your new home.

11) HIRE PROFESSIONAL MOVERS:

If you're not comfortable with heavy lifting, consider hiring professional movers. They have the experience and equipment to make the process smoother and less physically demanding.

12) NOTIFY YOUR NEW NEIGHBORS:

If possible, introduce yourself to your new neighbors and let them know about your moving day plans. This can help establish a friendly relationship from the start.

13) PREPARE FOR PETS:

If you have pets, make arrangements for their care during the move. Ensure they have a comfortable and safe space away from the hustle and bustle of moving day.

14) DOUBLE-CHECK EVERYTHING:

Before leaving your old home, double-check all rooms, closets, and storage spaces to ensure you haven't left anything behind. Also, confirm that all utilities are turned off and doors and windows are locked.
